

The ultimate

Yours to choose

Perfection in your hands

Designed for the highest success.

Unique Alpine has been known as one of the leading specialists in military and police precision rifles for decades. Based on this expertise and the aspiration to develop ourselves and our products, we transferred our knowledge to the areas of hunting and sport.

We now offer these newly developed rifle systems onto the market – and would therefore like to work with you, either as a trading partner or even potentially as a top trading partner (ProShop) with exclusive advantages, closely tied to our brand. Discover on the following pages what makes us and our products so fascinating and unique – and see for yourself why our rifle series should be an integral part of your retail product range.

Stefan Holme, CEO

Precision Tools - Made in Bavaria.

At Unique Alpine, located in the Bavarian town of Erding, decades of tradition and history are rooted in forward thinking, vision and the highest standards of true passion.

Our goal is always to develop, build and deliver the best product .

With our new „state of the art“ product – series TPG, UPG and JPR – we now offer rifles that are the result of these high standards.

Sophisticated in every detail and equipped with enviable pioneering technologies, these rifles combine surgical precision with absolute reliability – each technology an indispensable feature for success whether hunting, or target shooting.

Our rifles include as much as possible in their design. Every wish a shooter can make of his rifle is included – in a price class that is incredibly competitive and within reach of all shooters, beginner or full-blooded pro.

Perfection in your hands

A close-up, low-angle shot of a tan-colored sniper rifle with a scope and a cap resting on a dark gravel surface. The rifle is the central focus, with its barrel pointing towards the right. In the background, a lush green field stretches out, leading to a dense forest of tall, thin trees. The lighting is soft, suggesting an overcast day. The overall mood is quiet and focused.

Sporting success
is always a matter
of passion.

Passion meets perfection at Unique Alpine

TPG-3 A4

The tactical powerhouse.

Our multi caliber capable flagship product. Designed and built for professional users and to comply with the NATO AC/225 D14 specification. The TPG-3 leaves nothing to be desired in range, precision, modularity, robustness and workmanship.

Features TPG-3 A4

BUTTSTOCK

The buttstock is collapsible to the right without changing the overall width of the gun. Simultaneously, the bolt handle is secured. Overall length, cheek piece, and butt plate height angle and height are fully adjustable. A picatinny-interface allows for the use of a monopod or spacer plate from our range of accessories.

BARREL CHANGE

The barrels can be changed in less than one minute without any special tools or other devices and fixed repeatability in the system by means of four loss-protected integrated clamping screws.

RAILS

Freely positionable Picatinny mounting rails (MilSpec 1913 Rail) are available in five different lengths and can be mounted and form-fitted to eight different angles around the hand guard.

MATCH GRADE TRIGGER

The match grade trigger can be precisely adjusted to your wishes. It has an outstanding, crisp characteristic for optimal trigger control.

MAGAZINE

The magazines are made out of fiber-glass-reinforced, high-performance plastic. They are available in all three calibers and come in a short and long versions. The high-strength plastic is far superior to metal as a material for magazines since the material does not bend or deform under stress like a traditional steel magazine; therefore, feeding faults belong to the past.

SAFETY CONCEPT

- a) Firing Pin Safety
- b) Safety catch in case of an internal safety failure
- c) Grip safety (optional)

Technical specifications

MAGAZINE:	Polymer double stack .338 Lap. Mag./300 Norma Mag.: 8/5 rounds .300 Win. Mag.: 10/6 rounds .308 Win./6,5 Creedmoor: 10/15 rounds

Detachable, Folding Stock. Continuously Adjustable LOP, 13"-15.5". Multiaxially Adjustable Cheek Rest and Recoil Pad. 3 QD Sling Attachment Points on the Stock. Compatible with Standard AR15 Pistol Grips.

RELEASE
THE BE(A)ST.

Features UPG

PRIMARY EXTRACTION

The extraction starts with the rotation of the bolt. Stuck cases are a thing of the past, easy removal and safe ejection of the case or cartridge is ensured under all conditions.

CONTROLLED FEEDING

The cartridge is pushed under the extractor claw and held there during feeding. As a result, a safe and trouble-free feeding of the cartridge into the chamber is achieved in every possible weapon position.

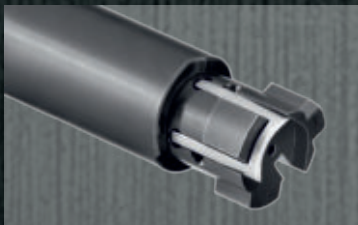

CONTROLLED EJECTION

The case is held in the ejection process by the extractor claw until it is ejected by the fixed ejector. Depending on the bolt velocity, the case drops or flies out of the action. This allows a situation-dependent ejection.

3-POSITION-SAFETY

The safety has three positions: „fire“, „safe“ and „safe + locked“. The safety acts directly on the striker therefore an accidental discharge as a result of a broken sear is impossible.

3-LUG-BOLT

Robust and reliable locking through three load bearing lugs machined from special high strength steel. The resulting 60° bolt throw allows for fast and reliable operation under all conditions.

MATCH GRADE TRIGGER

The match grade trigger can be precisely adjusted to your wishes. It has an outstanding, crisp characteristic for optimal trigger control.

MUZZLETHREAD

All rifles of the JPR and UPG series feature a threaded muzzle.

OPENING ANGLE

The small opening angle of 60° allows fast cycling.

STOCK

The stock of the UPG-1 is adjustable for LOP and comb height. Additionally the complete Stock assembly can be removed and e.g. be exchanged with a folding stock.

UPG-1 Fixed Stock

The universal all-rounder.

Developed in our tradition of striving for perfection. A chassis system that cuts no corners. With a wide range of supported calibers, barrel lengths and stock options the rifle can be configured to suit your individual application.

UPG-1 AR-15 Foldable Buttstock

The modular all-rounder.

- 6 Position Adjustable Stock
- Adjustable Cheek Rest
- Mil-Spec Buffer Tube
